## **ROCKCLIFF INCREASES LANDHOLDINGS AT SNOW LAKE, MANITOBA**

**SUDBURY, Ontario.** Rockcliff Resources Inc. (**RCR: Tier 1 TSX-V**) is pleased to announce that it has been granted from the Province of Manitoba, five Mineral Exploration Licences (MEL) in the Snow Lake area of Manitoba. The three year licences cover a total of 94,741 hectares of ground and allow Rockcliff the exclusive right to acquire, at any time, prospective ground within the MEL.

The MEL property covers a large, under explored portion of the Flin Flon greenstone belt south of Snow Lake. The belt is one of the most prolific and the largest Paleoproterozoic volcanic-hosted massive sulphide (VMS) district in the world. The underlying geology of the MEL property contains “juvenile arc assemblage rocks”, the same assemblage of rocks that hosts all of the mined VMS deposits in other areas of the Flin Flon belt.

The cost to acquire the MEL totalled \$49,409. To maintain its exclusive right in the MEL ground, Rockcliff will be required to incur aggregate, escalating exploration expenditures totalling \$1.3 Million over the three year period. In the first year, Rockcliff must spend a minimum of \$118,426 to maintain its exclusive right in the MEL property.

Kenneth Lapierre, President and CEO of Rockcliff commented, “The importance of this second project for Rockcliff is the additional opportunities for mineral discoveries within this prolific VMS district. It also secures the favourable geology adjacent to our recent acquisition from HudBay Minerals Inc. (**HBM: TSX**) of four VMS deposits and fifteen additional prospective properties within the belt” (see release dated March 23, 2007).

The information in this news release has been reviewed and approved by Peter Wood P.Eng., P.Geo., Vice-President Exploration and Ken Lapierre P.Geo., President and CEO of Rockcliff Resources Inc., both Qualified Persons in accordance with Canadian regulatory requirements as set out in NI 43-101.

### **Rockcliff Resources Inc.**

Rockcliff Resources Inc. is a Canadian resource exploration company focused on the acquisition and development of high-quality mineral assets associated with world class geology and in world class mining camps.

**Forward Looking Statement:**

*Some of the statements contained herein may be forward-looking statements which involve known and unknown risks and uncertainties. Without limitation, statements regarding potential mineralization and resources, exploration results, and future plans and objectives of the Company are forward looking statements that involve various risks. The following are important factors that could cause the Company's actual results to differ materially from those expressed or implied by such forward looking statements: changes in the world wide price of mineral commodities, general market conditions, risks inherent in mineral exploration, risks associated with development, construction and mining operations, the uncertainty of future profitability and the uncertainty of access to additional capital. There can be no assurance that forward-looking statements will prove to be accurate as actual results and future events may differ materially from those anticipated in such statements. Rockcliff undertakes no obligation to update such forward-looking statements if circumstances or management's estimates or opinions should change. The reader is cautioned not to place undue reliance on such forward-looking statements.*

*The TSX Venture Exchange does not accept responsibility for the adequacy or accuracy of this release.*
