## **ROCKCLIFF STRENGTHENS LANDHOLDINGS AT SNOW LAKE, MANITOBA**

**SUDBURY, Ontario.** Rockcliff Resources Inc. (**RCR: Tier 1 TSX-V**) is pleased to announce that it has been granted an additional Mineral Exploration Licence (MEL) from the Province of Manitoba and has also staked the Tramping Lake VMS Property. The Tramping Lake VMS Property is located approximately 6 km south of the recently discovered, HudBay Minerals Inc. Lalor Lake Deposit (indicative potential of 18-20 million tonnes grading between 7.7% and 8.8% zinc). Both properties cover under-explored juvenile arc rocks, the same assemblage of rocks that hosts all of the mined VMS deposits in the Flin Flon and Snow Lake camps.

The MEL ground covers a large, under-explored package within the Flin Flon greenstone belt south of Snow Lake and expands Rockcliff's present MEL ground to the east. The three year licence covers a total of 401 km<sup>2</sup> of ground and allows Rockcliff the exclusive right to acquire a 100% interest, at any time, in prospective ground within the MEL. Acquisition costs totalled \$20,070. To maintain its exclusive right in the MEL ground, Rockcliff will be required to incur aggregate, escalating exploration expenditures totalling \$551,911 over the three year period. In the first year, Rockcliff must spend a minimum of \$50,173 to maintain its exclusive right in the MEL property.

The 100% owned Tramping Lake property covers approximately 47 km<sup>2</sup> of under-explored, prospective juvenile arc rocks. It is situated within the Snow Lake camp and is located south of and within 6 km of the Lalor Lake Deposit. Acquisition costs totalled \$15,000.

The information in this news release has been reviewed and approved by Peter Wood P.Eng., P.Geo., Vice-President Exploration and Ken Lapierre P.Geo., President and CEO of Rockcliff Resources Inc., both Qualified Persons in accordance with Canadian regulatory requirements as set out in NI 43-101.

### **Rockcliff Resources Inc.**

Rockcliff Resources Inc. is a Canadian, resource exploration company focused on the acquisition and advancement of high-quality mineral assets associated with world class geology in world class mining camps. Rockcliff presently controls the Snow Lake VMS Project totalling in excess of 1,600 km<sup>2</sup> located within the Flin Flon greenstone belt. The project presently includes five historical VMS deposits and numerous additional areas with potential for VMS and nickel-copper-platinum group mineralization. Rockcliff also controls the Shihan VMS Project located in Northern Ontario.
